Projects

AutoDoc System

Service Station Management Portal
(Angular 12, Node JS, Express JS, MySQL)

An ongoing web application project conducting as the third-year group project that is to be completed in August 2021. Main functionalities of the project will enable service stations to manage appointments, manage roster, maintain inventory, and bill generation. Another segment of the project is to facilitate vehicle owners to handle service appointments through the system.

Student Information System for Cyber Campus-UOC

(PHP, HTML, CSS, MySQL)

This SIS helps both administrative staff and students to do the university education related activities efficiently. Main functionalities of the system are online student registration ,online course registration , examination paper management , paper marking and online result verifying system for examiners, online medical report submission method and all the other LMS functionalities.

Sports

School Level :

- Football
- Elle

University Level :

- Football
- Elle

Interests

- Programming
- Web Development
- Machine Learning
- Self Learning
- Chatbot Development
- Learning Music
- Playing guitar

Languages

- English : Fluent
- Sinhala : Native

Extracurricular activities

- Member Of IEEE Student Branch-UCSC (2019 to present)
- Member Of AIESEC Student Branch-UCSC (2019 to present)
- Assistant Chairman of Astronomical Society
- Assistant Treasurer of Astronomical Society
